Voluntary Disclosure – Business Updates

The Board of Directors (the "**Board**") of China Sunsine Chemical Holdings Ltd. (the "**Company**", and together with its subsidiaries collectively, the "**Group**") wishes to provide shareholders with an update on the Group's business.

China's GDP grew 4.6%[1] year-on-year in the first three quarters of 2026 ("**YTD3Q2026**"), and 4.5%[1] in the third quarter of 2026 ("**3Q2026**"), underscoring the generally stable growth momentum of China's economy todate. China produced 911 million[1] tyres in YTD3Q2026, representing a 0.8% increase year-on-year. Automakers sold a total of 23.27 million units[2] in China in YTD3Q2026, representing a decrease of 4.5% in auto sales year-on-year. Sales volume of New Energy Vehicles ("**NEVs**") rose 11.1% year-on-year to 12.47 million units[2] in YTD3Q2026, accounting for 53.6% of total new vehicle sales.

In 3Q2026, driven by increase in both Average Selling Price ("**ASP**") and sales volume, the Group achieved another stellar set of results. Sales revenue surged by 79% to RMB 1,366.9 million from RMB 762.8 million in the corresponding quarter ended 30 September 2025 ("**3Q2025**"). Sales volume reached another **record high** of 66,390 tonnes, representing a 22% increase compared with 54,304 tonnes in 3Q2025. The ASP in 3Q2026 increased by 47% year-on-year to RMB 20,436 per tonne, mainly due to the increase in the price of raw materials following the conflict in Iran and disruptions to shipping through the Strait of Hormuz. The Group responded swiftly by adjusting its selling prices. Gross profit margin increased by 6.4 percentage points to 27.3% in 3Q2026. Profit after tax soared 130% to RMB 201.3 million from RMB 87.5 million in 3Q2025.

For YTD3Q2026, the Group sold a total of 186,348 tonnes of products, representing a year-on-year increase of 14%, while sales revenue increased by 38% year-on-year to RMB 3,374.7 million. Profit after tax increased by 38% to RMB 455.6 million.

The global economy continues to face numerous challenges. The situation in the Strait of Hormuz remains uncertain, and crude oil prices have remained high and volatile. Looking ahead, raw material prices may experience wild swings, resulting in greater volatility in our selling prices.

Locally, the oversupply situation and intense competition in China's rubber chemicals industry continue to persist.

The Group will maintain its strategy of "Sales and Production Equilibrium" alongside a flexible approach to pricing. Beyond market expansion, we remain committed to high-quality growth, placing greater emphasis on environmental protection, green technologies and the development of specialty products, to maintain our market leadership position. We are confident of the Group's continued growth and success.

About China Sunsine Chemical Holdings Ltd.

Listed on SGX-ST on 5 July 2007, China Sunsine Chemical Holdings Ltd. ("**China Sunsine**") is a leading specialty chemical producer selling rubber accelerators, insoluble sulphur and anti-oxidants and other vulcanising agents. It is the largest rubber accelerator producer in the world and biggest insoluble sulphur producer in the PRC. It continues to serve more than 3/4 of Global Top 75 tyre makers, such as Bridgestone, Michelin, Goodyear, Pirelli, Sumitomo, Yokohama, Hankook, Cooper, Kumho Tires as well as PRC tyre giants such as Hangzhou Zhongce, Sailun Tires, Giti Tires and Shanghai Double Coin Tyre etc.

China Sunsine distributes its products under its own "Sunsine" brand, a brand which has been accredited as a "Shandong Province Famous Brand". In January 2017, China Sunsine's main subsidiary, Shandong Sunsine Chemical Co., Ltd was listed in the First Batch of National Champion Manufacturing Enterprise by the Ministry of Industry and Information Technology of the PRC.

Riding on the robust growth of the auto and tyre industries in the PRC, China Sunsine has been able to expand its production capacity, deliver superior products and services, and implement stringent environmental protection measures to stay ahead of the competition. It has achieved ISO9001:2008 standard for quality, ISO14001:2004 standard for environment, and GB/T28001-2011 standard for occupational health and safety management system.

[3] Annual capacity excludes capacity of intermediary materials such as 4ADPA and MBT
